

Technical Features

Upon turning on the diffuser, a spray of product will be automatically released (avoid facing the device directly). Factory settings provide a single spray every 15 minutes for 24 hours. After the first spray, the green LED will flash once for three seconds, starting the countdown (15 minutes) for the next spray.

LED Indicators:

- **Solid green light:** the spray canister is full and operational.
- **Flashing red light (every second):** the spray canister needs to be replaced (approx. 3000 sprays).

Instructions for use

The **green LED** will flash 3 times and a short beep will sound to confirm signals received from the remote control.

Dispensing intervals: You can select a spray every 5, 10, 15, 20, 25, or 30 minutes.

DAY/NIGHT/24H function: Allows you to select the diffuser's operating mode: every 8 hours (16-hour pause) or every 12 hours (12-hour pause).

1 SPRAY / 2 SPRAY / 3 SPRAY function: Allows you to set the number of product sprays per dispensing cycle (one, two, or three sprays).

SUN/MOON/SUN+MOON function: Allows you to select the operating mode: Day ("Sun"), Night ("Moon"), or 24 hours ("Sun+Moon").
